

SynBio Global Conference

Join us April 29 - May 1

Las Vegas Convention Center

SynBio is a multidisciplinary area of research that seeks to create new biological parts, devices, and systems, or to redesign systems that are already found in nature it is a branch of science that encompasses a broad range of methodologies from various disciplines.

Due to more powerful genetic engineering capabilities and decreased DNA synthesis and sequencing costs, the field of synthetic biology is rapidly growing.

Don't wait! Join the party, make money, you will be rich and live long. You will be able to have great holidays in the sun and you will never grow old. The potential is incredible, just believe in it, yourself and us.

Our Platinum Partners

SyntheticBio International – Toronto, Canada

Leceits in biotechnology, genetic engineering, molecular biology, molecular engineering, systems biology, membrane science, bioohetics, chemical and biological engineering, electrical and computer engineering, control engineering and evolutionary biology.

Robo Nucleics – Singapore

Robotics, Lab instruments, lab integration software and hundreds of third party devices for laboratory automation solutions.

BioBots Inc – Boston, USA

BioBots Inc is committed to advancing healthcare by applying science, technology and the passion and creativity provides gene synthesis services to synthetic biology and biotechnology industries.
